

CONSTRUCTION europe

The magazine for Europe's construction industry

2018 EDITORIAL PROGRAMME

EDITORIAL PROGRAMME 2018

February

Intermat preview

A first look at what visitors can expect to see at Europe's major construction equipment event during 2018. Intermat will be held from 23 to 28 April, 2018, in Paris, France.

Maximise your investment at the biggest construction show this year and advertise your presence and stand location in these issues.

March

Intermat show guide

CE provides a definitive guide to the new construction equipment, components and services that will be on show at Intermat. The show will also be paired with World of Concrete Europe.

Portable Power and Site Equipment

CE takes a look at the latest equipment that is available to make sure that a construction site operates smoothly and economically.

Telescopic Handlers

Telehandlers are among the most versatile machines on any jobsite, with an almost limitless number of uses. CE examines the new technologies and capabilities.

Components

Transmissions, undercarriages, hydraulics, electronics, seats and steering wheels are among the products that might be included.

April

Intermat stop press

A final opportunity to find out who will be exhibiting what at the important Intermat exhibition in Paris, France. CE, along with its sister-publications, will be at the show.

Mini Excavators

Whether the job is a smaller one, or the access is restricted, the compact models of excavators are a crucial part of the job.

Haulers

Haulers, whatever their size, are the workhorses on a construction site. As with all machinery, efficiency is crucial in the construction world of today.

Access Equipment

With help from CE's sister-publication *Access International*, this interesting sector is brought up to date, with the latest news from the world of access equipment, including details of recently-launched machines.

May

Ankomak

The Turkish construction show will be held from 25 to 29 May in Istanbul.

CTT Show

CTT 2018 will be the 19th International Show of Construction Equipment & Technologies to be held in Moscow, Russia. This annual trade show, held from 5 to 8 June, is previewed.

Roadbuilding

CE's first look this year at the dynamic roadbuilding sector. With infrastructure projects planned all over Europe, it is an exciting time for roadbuilding machines.

Cranes

Cranes are such an important part of the jobsite, and this sector is discussed, in conjunction with *International Cranes and Specialized Transport*, a sister magazine of CE.

Drilling

A specialist sector, but an important one, all elements of drilling come under the spotlight, as CE looks at new machines and techniques for both surface and underground work.

June

SIGNET AdStudy® FREE fully independent advertising research with half page or larger advertisement. See page 8 for more information.

Hillhead Show

Held in a quarry, this UK show comes around every two years, and is a popular date on the calendar. In 2018, it will run from 26 to 28 June, and CE will preview the show.

Concrete

Concrete pumps, mixers and other machinery for the manufacture and delivery of concrete will be the focus of this feature. Concerns over the environmental impact of concrete are also increasing.

Pumps

Dewatering pumps can be crucial to the smooth running of a jobsite, and they have to work efficiently in often difficult circumstances.

Hybrid and Electric Technology

Innovation in hybrid and electric technology is booming in response to green and fuel efficiency demands.

Engines

CE's second look of the year at the crucial developments being made in the world of engines.

Rental

Sister-publication *International Rental News* reports on the fast-moving rental sector. In some European construction markets, rental is a fundamental part of the way the industry works.

Crushing and Screening

Steps are constantly being taken to find the best ways to crush and screen materials in this dynamic sector, and CE reports on the latest hardware and methods.

September

Compact Loaders

When space is at a premium, the compact loader comes into its own. Recent developments come under scrutiny as CE examines the sector and unearths the new machines on the market.

Foundations

Starting at the bottom, efficient, safe and effective machinery is needed to establish the foundations on a construction site. CE looks at the latest piling rigs and other machinery to help a project get the kind of start that it needs.

Fuels and Fuel Efficiency

While it may depend on who is paying the bills, manufacturers and operators are searching for the most efficient ways of working. Sometimes this is down to the machine, while in other cases this could be down to the fuel. Either way, there is a real desire to save money.

October

Intergeo INTERGEO

The 2018 geospatial show will be held from 16 to 18 October in Frankfurt, Germany.

GIC-Expo Concrete Show

The second International concrete days exhibition in Italy will be held from 8 to 10 November, 2018.

Excavators

Performance is everything when it comes to excavators, including reach, digging force, lifting capacity and bucket size.

Demolition and Recycling

CE sister publication *Demolition & Recycling International* magazine reports on the sector.

Surveying

The increasingly sophisticated possibilities in surveying are highlighted, as still more innovative techniques are introduced.

November

Falsework and Formwork

Innovation and ease of use are an integral part of falsework and formwork techniques nowadays. CE investigates the very latest methods from the leading companies in this sector.

Utilities

Specialist knowledge and equipment are needed for the laying of pipes and fibre optics, plus other jobs in the utility sector. Although the work may often be on a small scale, the projects can be huge. This important sector is reviewed, and the latest developments revealed.

Tunnelling

CE produces its annual round up of the major tunnelling projects across Europe. There have been many major tunnelling projects across the continent over the past few years, and more projects are being added all the time.

December-January

Roadbuilding

The important roadbuilding industry gets a second feature. Whether asphalt or concrete, motorway or minor road, there is a need for pavers, rollers and other roadbuilding equipment to help connect Europe's major conurbations, and keep traffic flowing across the entire continent.

GPS and Telematics

The quality and quantity of information flowing to and from a machine is growing all the time. Location can be checked, a machine's vital signs monitored, and increasingly accurate digging parameters easily dialled in, to ensure efficient operation at all times.

Breakers

With help from sister publication *Demolition & Recycling International* magazine, the latest breaker models are revealed, with discussion about the sector.
